PROFESSIONAL EXPERIENCE

Frontend Software Developer Tashkent, Uzbekistan · Hybrid

DriveLens AI LLC *Nov 2025 – Present*

- Developed a web service from scratch using Vue 3, TypeScript, and Vuetify: designed the application architecture, implemented the user interface, integrated REST APIs, and covered key user flows with Cypress tests.
- Enhanced a video-processing system by implementing multi-stream video playback, adding multilingual support mwith Vue I18n, and developing new user interactions using Vue-Konva, improving usability and the overall user experience.
- Migrated the client application from GraphQL to REST APIs in close collaboration with backend developers, ensuring a smooth transition without loss of existing functionality.
- Developed a unified UI system using Vuetify and MDI, refactored the codebase, and improved the developer onboarding process.
- Developed and integrated automated end-to-end tests with Cypress, improving application reliability and reducing regressions.
- Collaborated with backend developers, QA engineers, and analysts in a cross-functional team, contributing throughout the feature development lifecycle

Frontend Web Developer Tashkent, Uzbekistan · On-site

InfinBANK *Oct 2024 – Nov 2025*

- • Redesigned and enhanced key sections of the corporate website built on 1C-Bitrix, including the Cards section, Visa Cards Page и Tariffs and Offers section, improving usability and visual presentation. Implemented responsive, cross-browser layouts based on Figma designs for consistent rendering across popular devices and browsers.

- Optimized the partner network page by introducing an SPA architecture and lazy loading, significantly reducing initial rendering time and improving overall interface performance.
- Developed the partner network section of the administrative panel from scratch, comprising 8 subsections, using Vue 3, TypeScript, and Vuetify with REST API integration, simplifying partner data management and improving internal business processes.
- Actively participated in Scrum workflows, including two-week sprints, daily stand-ups, task planning, and retrospectives.

Intern Frontend Web Developer Tashkent, Uzbekistan · On-site

InfinBANK *Jul 2024 – Oct 2024*

- Learned Vue.js during the internship and applied it to develop a new administrative panel module designed to integrate with the Zolotaya Korona payment system.
